EXPERIENCE REPORTS

Wheel of Care | Image material
Katja Eidam | Image material

Dear i:SY Lover,

for i:SY, 2026 will be a year of both further development and consistency. We remain true to our values and evolve them consistently

Our compact bikes have always stood for quality, durability and riding pleasure on all routes. That's what makes i:SY special – and that's exactly what we want to bring to life this year with new ideas and products, fresh colours and clever technical details. Because at i:SY, we believe that only what lasts a long time is truly sustainable.

That's why each of our bikes not only features state-of-the-art technology, but also a wealth of experience, passion and attention to detail. So you can rely on your i:SY every day – for many years to come.

I hope you enjoy discovering our new products and wish you a carefree, inspiring cycling season in 2026!

Sincerely,

Jessica Schumacher | Managing Director

i:SY MODEL OVERVIEW 108

THE i:SY PRINCIPLE

ONE SIZE FITS ALL!

We have developed a frame that fits riders between 1.50 m and 1.90 m tall equally well. For people taller than 1.90 m or heavier, we have developed the i:SY XXL.

Although the i:SY itself is not a heavyweight, it can withstand a lot! The permissible total weight for the i:SY Compact model is 150 kg (120 kg body weight), and for the i:SY XXL model it is an impressive 180 kg (150 kg body weight).

i:SY RIDING FUN WITH 20 INCH

The adjusted gear ratio ensures a normal cadence, comparable to a 28-inch bicycle. The wheelbase is also the same as that of a 28-inch bicycle. Thanks to the lower flywheel mass of the small 20-inch

wheels and the resulting rapid acceleration, you'll be among the first to set off at the traffic lights on your i:SY. What's more, with 20-inch wheels you'll experience full agility – light and manoeuvrable.

i:SY DOWN TO THE LAST DETAIL

The wide comfort tyres, stiff frame and low centre of gravity make you feel safe and comfortable on the i:SY right away. The i:SY is also extremely resilient and stable, which is partly due to its balanced weight distribution. This is facilitated by the position of the battery behind the seat tube. When you lift the i:SY by the 'carrying handle', it feels well balanced in your hand.

THE ORIGINAL.

OUR i:SY MODEL FAMILY

Our first models appeared at EUROBIKE in 2007. A lot has changed since then. Our range of models and accessories has grown, we use new materials and our frame design has evolved. That's why, in addition to our original frame shape 1.0, we now also offer our new frame shape 2.0. Frame shape 2.0 not only features a modern design, it also allows us to integrate a quick release directly into the frame – a frequent customer request that we incorporated into our development. On the following pages, we present our models so that you can make an informed decision about which one will be your favourite.

i:SY COMPACT

The all-rounder for people
from 1.50 m to 1.90 m tall

i:SY XXL

family runabout for two co-pilots

KNOW YOUR i:SY

EVERYTHING AT A GLANCE

The individual i:SY models differ mainly in two features – the motor and the gearbox. This is also reflected in our model names. Here is a brief overview of what the abbreviations stand for:

SX CX PX	BOSCH Performance Line SX CX PX Motor
ZR K	belt chain
F RT	freewheel backpadel
P12	PINION 12-speed Motor.Gearbox.Unit
E5	SHIMANO 5-speed hub gear
N3.8	ENVIOLLO 380 continuously variable hub gear
N3.8 Auto	ENVIOLLO eShift AUTOMATIQ continuously variable hub gear
S10	SHIMANO Tiagra 10-speed derailleur gears
S8	SHIMANO Nexus 8-speed hub gear SHIMANO Claris 8-speed derailleur gears

SPECIAL EQUIPMENT

For special requirements, we offer two special configurations. In our Adventure line, we use components that make the i:SY Adventure models particularly suitable for off-road use. These include a suspension fork, a suspension seat post that can

be lowered, and deep-tread tyres. In our Comfort line, we equip the i:SY models ex works with a more curved handlebar, wider saddle and suspension seat post. This not only allows you to sit more upright, but also enjoy even greater seating comfort.

COMPACT STORAGE

Whether at home or on the go, our i:SY models score points with their small footprint. Thanks to the standard components, each model can be reduced to a minimum in no time at all and without any tools. This pays off in narrow lifts, crowded bicycle compartments or caravan garages. Compact. Practical. i:SY.

	length*	height*	width*	entry level*	loading area
i:SY Compact 1.0	1609 mm	1134 mm	280 mm	480 mm	-

i:SY SKYFLY

DISCOVER THE EASE!

i:SY SKYFLY S10

The sleek design literally nestles into the wind.
The frame construction ensures exceptional stability.
A perfect combination of speed and lightness!

i:SY SKYFLY S10

PURE CARBON STRUCTURE!

The UD carbon design combines simple elegance with technical sophistication. Fine fibres are woven into a strong composite and shine with their low weight. When exposed to sunlight, the carbon

fibre composite reveals its full beauty. Paired with the 10-speed derailleur, this model is ideal for cyclists who appreciate both design and technology. The derailleur shows its full range during sprints to work and

challenging mountain climbs. The i:SY SKYFLY S10 combines all of this in one model. Thanks to its tool-free height adjustment, it is also ideal for multiple riders of different heights. Due to its small footprint,

folding pedals and Speedlifter Twist, it can be reduced to a width of 29 cm in no time at all – ideal for the rear luggage rack or narrow storage room. Here, holidays and everyday life are skilfully combined.

i:SY SKYFLY E5

Just set off, see something new and leave everyday life behind. With our lightweight carbon bikes, you can quickly reach places that are inaccessible by car. For example, the city centre of Regensburg, a UNESCO World Heritage Site.

i:SY SKYFLY E5

ARRIVE, UNLOAD, EXPLORE

Our i:SY SKYFLY models are perfect for those who use a combination of car and bicycle for their mobility needs. Thanks to their low weight, they can be quickly lifted off the bike rack. Adjust the handlebars, fold out the pedals and off you go on your exploration tour. Our new frame colour, dotted grey matt – bright orange speckles

on elegant grey – is a real eye-catcher on your tour. Understated yet unusual. We love it. In combination with the new BOSCH Performance Line PX motor, you'll experience a whole new riding sensation. Powerful when starting off, dynamic on the road and controlled gear shifting – the best combination for your next adventure!

CITY TIP | REGENSBURG

The 'Manhattan' of the Middle Ages – thanks to its location on the Danube, the former Roman military camp developed into the centre of Europe in the 17th century. Trade flourished and the city revelled in wealth. This can still be seen today in the historic old town. Fortunately spared from World War II, Regensburg is the best-preserved medieval city in

Germany. For this reason, it was awarded UNESCO World Heritage status in 2006. The Stone Bridge, St. Peter's Cathedral and the Old Town Hall are just a few of the architectural monuments worth seeing. A bike ride along the banks of the Danube to the historic Walhalla is also a must when visiting Regensburg.

EXCURSION TIP | WALHALLA

Not far from Regensburg in Donaustauf, the Walhalla rises up, visible from afar. A temple which was built in classical style and is surrounded by columns. It was commissioned by Ludwig I of Bavaria at the beginning of the 19th century. The idea for a memorial to distinguished German-speaking men and women arose from the humiliation of

Napoleon’s triumphal march. The building, clad in precious marble inside and out, stands on a huge staircase on the banks of the Danube. The best place to admire the Walhalla in all its splendour is from the opposite bank of the river. Here, away from the tourist crowds, you can still have a little race with the hares in the fields.

iSY S8

Mobility reimagined – there are many reasons to get from A to B, and the solution is quite simple: hop on and ride off. With our entry-level model, you'll reach your destination in no time. And because the wind in your hair is so enjoyable, you'll quickly want to do another lap. Who knows what new discoveries await on familiar paths – it's worth getting on your bike!

i:SY S8

ONE FOR ALL

Our i:SY S8 is a true all-rounder. With its tool-free height adjustment, it is suitable for riders from 1.50 m to 1.90 m tall. The balloon tyres offer a comfortable ride, which can be varied by adjusting the tyre pressure. For even more comfort, we fit the comfortable by,schulz suspension seat post as standard.

It gently absorbs bumps such as cobblestones or potholes. Because efficient mobility is particularly important in everyday life, our i:SY can also be a real workhorse. With front and rear racks, it offers numerous transport solutions. Whether it's children, dogs or bulk shopping - we have the right solution for everyone!

i:SY INTERVIEW

WHEEL OF CARE

SLOW CARE ON A FAST BIKE

“ Wheel of Care is not just about health, but rather about rethinking care in our cities. By travelling by bicycle all year round, being inclusive and multilingual, and taking both medical and social needs into account, we are showing that a different kind of care is possible. We are proud to do this in a diverse city like Brussels and hope to inspire many others to follow suit.”

Information
on YouTube

WE LOVE CARE

There is a non-profit organisation in Brussels that wants to revolutionise healthcare. They offer care that is inclusive, affordable and people-centred, known as 'slow care'.

Their unique selling point: they only use electric bikes – which can be a challenge in a city as large and busy as Brussels. What name could be more fitting than Wheel of Care – pronounced 'We love

care'? We spoke to founder and managing director Flora Billiow about what drives her, the hurdles she has to overcome and why she chose an i:SY 2017 to bring her idea of people-centred care to life.

and on
Instagram

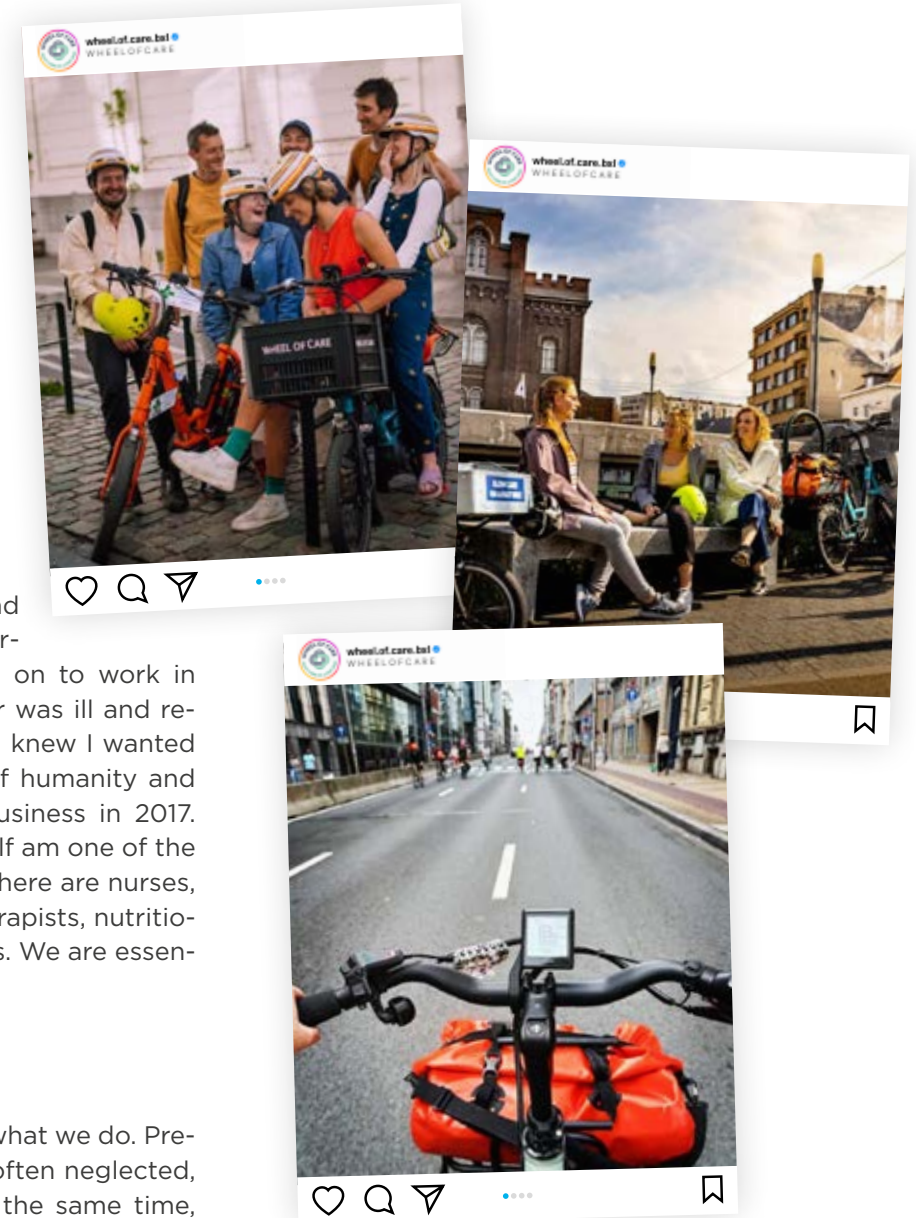

WHO AND WHAT IS BEHIND WHEEL OF CARE?

Wheel of Care stands for holistic and sustainable care. Based on my personal experiences, I decided early on to work in healthcare. At the time, my mother was ill and receiving external care. That's when I knew I wanted to do the same. With this vision of humanity and sustainability, I started my own business in 2017. We now have 25 employees. I myself am one of the midwives in the team. In addition, there are nurses, doulas, psychologists, massage therapists, nutritionists, acupuncturists and volunteers. We are essentially a whole village of carers.

WHAT WOULD YOU LIKE TO DRAW ATTENTION TO?

People are always at the heart of what we do. Prenatal and postnatal care, which is often neglected, is particularly important to us. At the same time, we want to draw attention to loneliness in old age. Brussels is one of the most diverse cities in Europe, but this also leads to social fragmentation. Care is closely interwoven with social structures. Preventing isolation not only contributes to individual

well-being, but also promotes healthy communities. We also want to show that care can and should be sustainable. Cycling is a key solution for people, but also for our planet.

IS IT PRACTICAL TO DO YOUR JOB BY BICYCLE?

Surprisingly, yes! We get around quickly, avoid traffic jams and don't need to look for parking spaces. We are also visible to people in the neighbourhood. Rain or shine, we always cycle. It's part of our DNA. Bicycles give us flexibility and efficiency while allowing us to stay true to our environmental values.

WHY DO YOU RIDE i:SY BIKES THROUGH BRUSSELS?

From the beginning, we wanted the bicycle to be both a symbol and a tool for our work. We came across i:SY through a partner and knew immediately that it was the right fit: compact, solid and strong enough to transport our medical equipment around

the city. Sustainable and practical – exactly what we stand for.

DO YOU ENCOUNTER STRUCTURAL BARRIERS IN THE HEALTHCARE SYSTEM?

Yes, we are often cited as a good example, but there is no reliable funding. We are dependent on temporary, project-based financing and donations. Without long-term support, our work is at risk. We call on politicians to view our approach not as an experiment, but as a serious solution for a healthy society, especially here in Brussels.

WHAT MAKES YOUR EVERYDAY LIFE DIFFICULT?

Cycling uphill on a rainy day with a fully loaded bike is not necessarily easy – but it is doable. Some families live in precarious conditions, which requires time and emotional presence. For older people, loneliness can sometimes be as stressful as health problems. Since we started, 13 bikes have been stolen from us. But all that is made up for by the freedom that cycling gives us and the trust we have in our patients. Every ride reminds us why we do what we do.

GREATEST SUCCESSES

- Over 80,000 visits – exclusively by bicycle since 2017
- Expansion of our area of operation
- Establishment of a multidisciplinary team
- Creation of safe, inclusive places for all generations

And probably the biggest one of all: countless people who tell us that our care gives them security, relaxation, dignity and a sense of belonging.

WHAT MAKES YOU THE HAPPIEST?

The smiles and relief on people's faces when they open the door for us. Seeing how new parents receive support or how older people become part of their community again. And the strong sense of connection and hope that we spread throughout the city we all love so much.

HOW CAN WE SUPPORT YOU?

- Partnerships with organisations that share our values
- Volunteers and donors who want to join our 'village of care'
- Spreading our story that care can be sustainable, inclusive and deeply human.

KATJA EIDAM

aka Muldetalradler

Katja works in a small local government office in Saxony. Dusty? Dull? Not at all, because Katja turns official announcements into colourful carousel posts for social media. After work, she swaps her keyboard for pedals and goes on cycling tours with her beloved i:SY Pop Art. She records her 20-inch adventures in words, pictures and sound. We asked Katja to tell us what cycling means to her and what role the i:SY plays in it.

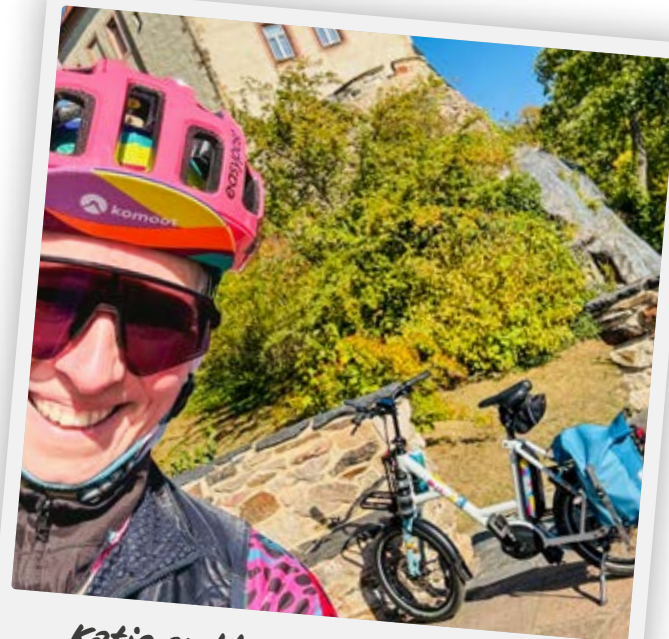

IT CAN GO SO WELL

– EVEN IF ONE PREFERS TO RIDE.

There is hardly anything better than spending every free minute outdoors in nature. Preferably on my i:SY, of course. It takes me comfortably everywhere – far beyond what I could ever achieve on foot, but more on that later. I usually start my tours right outside my front door, because I live in the middle of Saxony's castle country. Even on my so-called 'front door tour' there are three magnificent sights: Waldenburg Castle, Wolkenburg Castle and Rochsburg Castle. And when I veer off towards Thuringia, there just happens to be a 'half castle' in the way. Each tour has its own charm: sometimes it's a brisk ride on asphalt, sometimes a rustic ride over hill and dale.

Sometimes there are even small cave passages. Fortunately, my i:SY is manoeuvrable enough to handle it all. Thanks to its 20-inch tyres and short wheelbase, it is as easy to handle as a well-organised ladies' handbag and is even much lighter than that. ;-)

The POP ART naturally cuts a fine figure against the imposing backdrop of the castle. True to the

Katja and her i:SY POP ART E5

motto: if you're going to have a royal view, you might as well have a stylish vehicle to go with it! Every now and then, I leave the Mulde cycle path and plunge into the hustle and bustle of the city. There, I ride leisurely through alleys and streets, past old façades, industrial wastelands and, of course, museums! For me, they are like little time machines in the middle of everyday life. Whether I end up at a large exhibition or a small, charming city museum, I always take something along with me – new impressions, a good mood and the feeling that I have got to know the city a little better.

HOW THE i:SY GOT ME BACK ON TRACK

To be honest, everything I do today would not be possible if I had to do it all on foot. I have a personal disability – congenital hip problems. That's why long hikes have never really been my thing. My musculoskeletal system has a clear opinion on this: no long distances on foot, please! So the bicycle has always been my preferred choice. Practical, easy on the joints and with a wonderful feeling of freedom.

Katja on her 'front door round'

Muldetalradler
on Instagram

When I came across the i:SY concept, it was actually something like 'love at first sight'. I was looking for a bike that not only looked good, but also positively supported my physical condition.

And lo and behold: the special frame geometry, the low step-through and the incredible manoeuvrability — the i:SY simply has it all! It's easy and safe to ride and great fun, whether in the city, the countryside or up a castle driveway. And to be honest, it looks pretty good too. A lot has changed since I got my i:SY. I ride regularly and feel fitter. Depending on how I feel on the day – or, as I call it, my 'joint condition' – I use the motorised assistance.

Between my KulTOUR trips, the bike becomes a training partner that never complains but always motivates. I admit: at first, I thought that with e-assistance, you weren't doing 'real' sport. Well, I was proven wrong! Today I know that fun, exercise and training are not mutually exclusive: you just ride i:SY.

i:SY E5 ZR

Set sail for new shores – switch off from everyday life and immerse yourself in the tranquillity of nature. The best way to do this is on a multi-day cycle tour, far away from the hustle and bustle. Our new i:SY Touring is the ideal companion for this. Just at the sight of darkmore green and galactic blue, you will start dreaming of your next expedition.

i:SY E5 ZR

BUILT FOR SOMETHING NEW

Our new i:SY Touring models combine the comfort of our Adventure models with on-road qualities. The suspension fork and parallelogram seat post offer pleasant comfort at the contact points on the handlebars and saddle. Your hands and bottom will thank you for it. The road tyres, Schwalbe Super-

Moto X, carry you smoothly across the countryside. Where your gaze can wander and you can enjoy the moment. Relaxed in the saddle, you can go on extended excursions – whether mossy heathland or wide open spaces under the coastal sky, freedom calls. What are you waiting for?

i:SY N3.8 AUTO COMFORT

Who isn't familiar with the preconception that riding an automatic means you forget how to change gears? Even if that's true, cycling should be one thing above all else – fun! And with the Automatiq gear system from EN-VIOLO, that's guaranteed. Once you've adjusted it, you can concentrate fully on exploring new cities, forests or whatever else takes your fancy.

i:SY N3.8 AUTO COMFORT

AUTOMATICALLY IN THE RIGHT GEAR

In hectic traffic, you have to concentrate on other traffic participants and, in unfamiliar surroundings, also find your bearings. So it's a relief when the gear shifting happens automatically. Your mind is free to

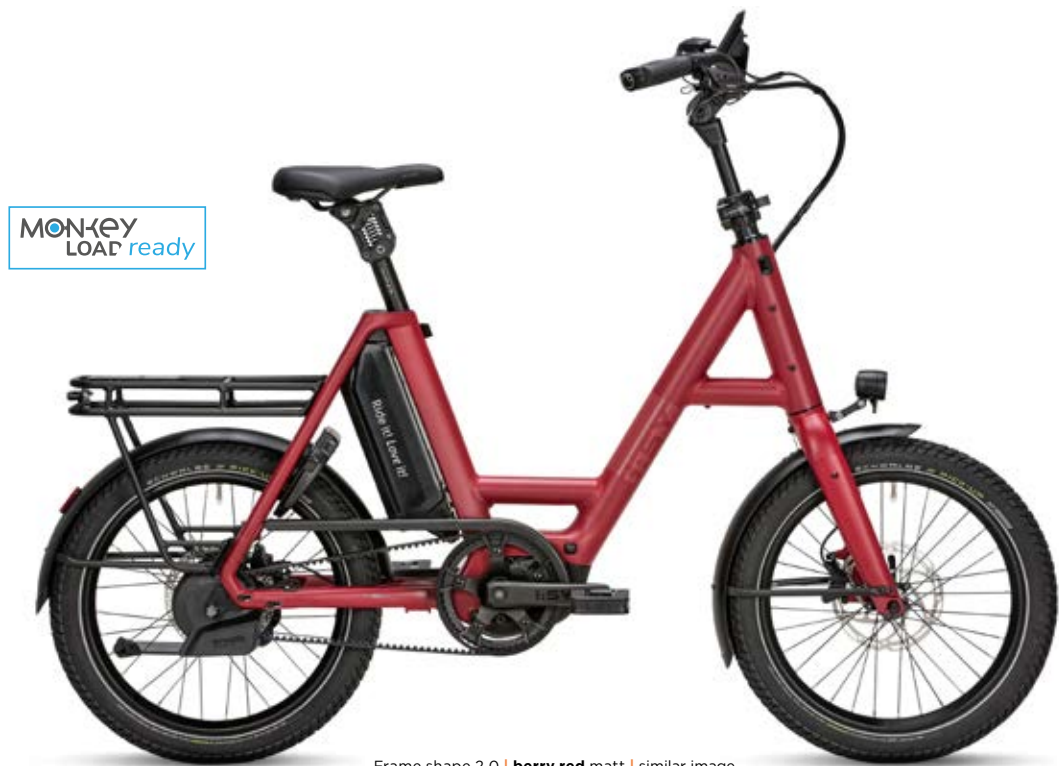

focus on what's important, and without a gear lever on the handlebars, you also have a better overview. The Automatiq gear system from ENVIOLLO is set to your cadence once and then takes care of

NO MORE
MANUAL
SWITCHING

everything. This means you always pedal with the same resistance. This not only protects the motor, but also your knees. Thanks to the closed system, maintenance intervals are greatly reduced – saving you time and money.

i:SY P12 ZR

An idea that was born almost 20 years ago during an internship at Porsche has now developed into state-of-the-art technology in the bicycle industry. A unit consisting of a gearshift and drive, finely tuned to each other so that it works as precisely as the gearshift of a sports car. Virtually wear-free and with an oil change every 10,000 kilometres, the PINION MGU is designed for performance under the toughest conditions. Perfectly suited when the journey is the destination.

NOTE: The i:SY SPEED XXL P12 ZR is delivered without a front luggage rack as standard. In our range of accessories, you will find a front rack and a suspension seat post that are approved for this S-pedelec.

i:SY ADVENTURE *TIME*

Just get out of the city and into the woods. Fresh air around your nose, roots under your tyres, detours through streams and breaks at crystal-clear forest lakes – all this makes the trip an experience you will remember. Even more so when you are sharing it.

i:SY S10 ADVENTURE

GOODBYE ROUTINE!

Put your feet up and ride through the puddle! It brings back childhood memories and that feeling of carefree freedom. That's exactly what you'll experience with our i:SY S10 Adventure. With suspension forks and deep tread tyres, you're

perfectly equipped for forest adventures. New this season: we're building our i:SY Adventure veteran with the new 2.0 frame platform. A fresh design and integrated quick release take the outdoor experience to a whole new level.

» **TRAVEL TIP:** Leave the car at home and travel by i:SY and train instead. Thanks to its small footprint, tight turning circle and tool-free storage, it's a breeze. Simply enjoy a more relaxed journey – and do your bit for the environment!

i:SY E5 ADVENTURE

ADVENTURE IS IN THE AIR!

Adventurous joyrides are even more fun in good company. They keep you fit and there is always something new to discover. Our compact i:SY E5 Adventure also has something new to offer. The i:SY logo on the top tube shines in orange. The complementary contrast to the blue frame intensifies the luminosity of both colours. A real eye-catcher.

When it comes to colours, we took inspiration from our touring series for the i:SY XXL E5 Adventure. The nature-inspired frame colours darkmore green, reminiscent of moorland and forest landscapes, and galactic blue, reminiscent of starry skies when camping, are perfect for long outdoor tours. Get on your saddle and off you go.

PLANNING A LONGER TRIP?

On a longer tour, you will quickly ask yourself where you to charge your battery along the way. Navigation apps, such as the versatile outdoor app komoot or the cycling-specific app Naviki, make it easy to find e-bike charging stations. Simply enter your

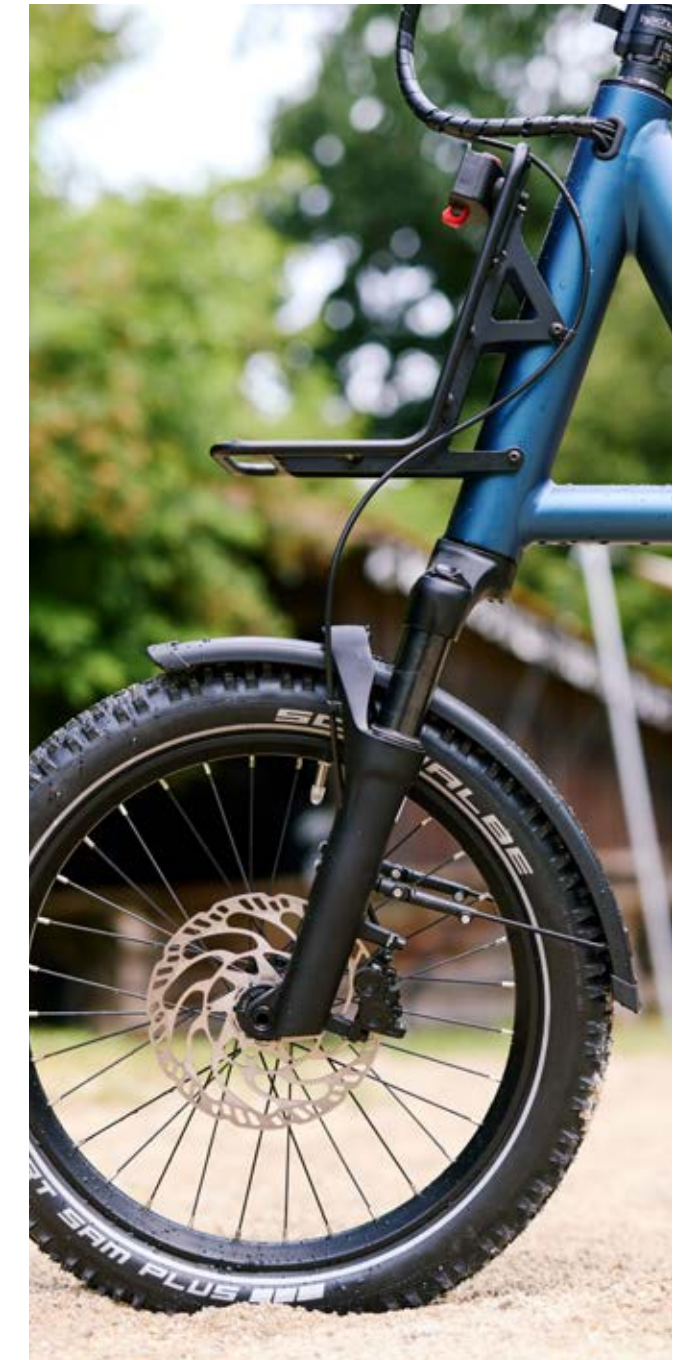

planned route and the available charging stations will be displayed on the map. Tip: It's best to zoom in a little so you can also find nearby stations. In tourist regions, it is often possible to charge your e-bike in restaurants or hotels, often free of charge.

i:SY XXL P12 ADVENTURE

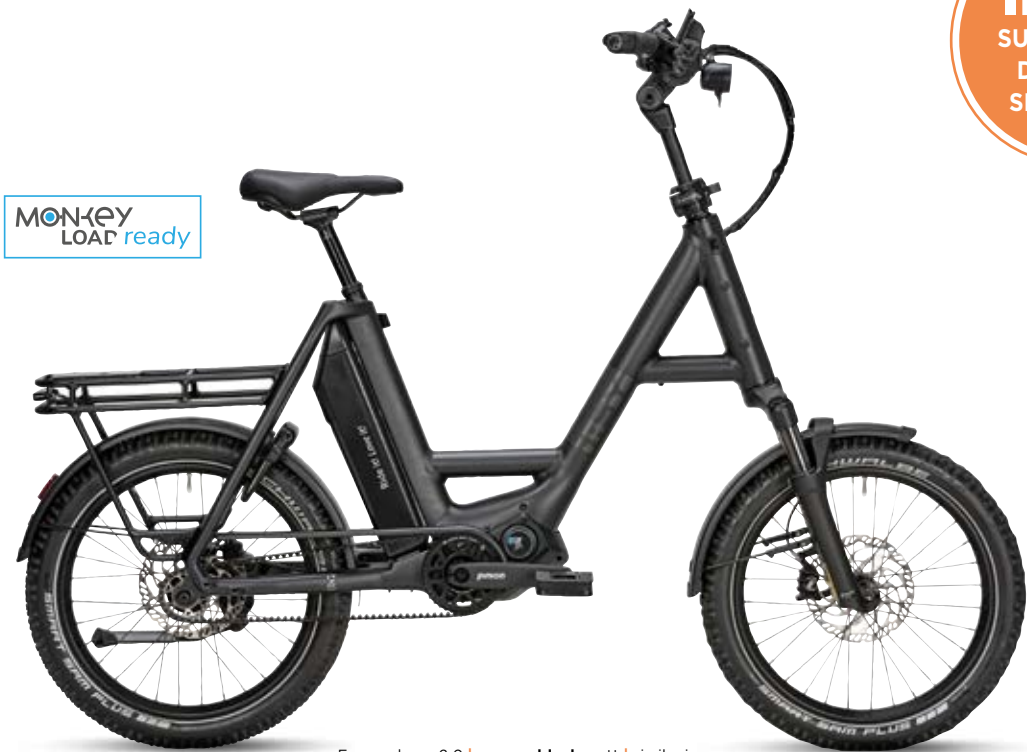

PURE ADVENTURE FEELING

Is your adventure so demanding that you have to concentrate fully on the trail? Then the Auto.shift function of the PINION gearbox is just right for you. Set your desired cadence once and the system will keep your pedalling speed constant. If the ground gets wet, the knobby tyres provide

crisp grip. With the suspension fork, the forest trail is exactly your path. Designed for particularly tall riders, our i:SY XXL P12 ZR Adventure offers everything you need to conquer previously undiscovered forest lakes and mountain tops. Let's go!

i:SY P12 LONGTAIL

Monday morning, everyone is running late, the children need to get to the kindergarten and you need to get to the office. The morning rush hour traffic is the last thing you need. Would you rather start the day feeling calm and relaxed?

Then take our i:SY P12 LONGTAIL and simply ride past the traffic jam. There's room for two co-pilots in the back. With the powerful PINION MGU, you can get off to a flying start and enjoy the breeze. Relaxed. Urban. Mobile.

similar image

i:SY P12 LONGTAIL

LIFE, LEISURE, PLEASURE

Load everything up and off you go! The adjustable full suspension ensures optimum comfort for everyday family life. Adjustable by lever, the rear suspension compensates for approx. 40 kg. Perfect for when the children have got off and the journey continues. The rear loading area is designed for

50 kg. It can accommodate up to two child seats or, alternatively, the Eurobox standard. Our clever accessories include a railing, seat cushions and foldable footrests. Want to go for a picnic in the park but everything's taken up in the back? No problem – for even more transport volume, you can mount

similar image

similar image

our i:SY Heavy Cutie. The practical attachment to the head tube transfers the weight directly to the frame – for carefree steering.

Speaking of practical – with the integrated stand, our i:SY P12 LONGTAIL can be parked upright to save space. Ideal in tight urban spaces.

DRIVE

i:SY CARGO

Do you like to travel without a car, but still often need to move large items? Then our i:SY CARGO is just right for you. You know what you need to transport – we have the right solution.

With our versatile accessories, we can meet every transport need. Thanks to its compact design, it not only saves space when parked, but also drives exceptionally well. Agile yet stable, it handles every corner with ease, and even those new to cargo bikes will feel right at home.

i:SY CARGO ACCESSORIES

i:SY CAB

Our award-winning transport solution for when your most precious cargo is travelling with you. We have designed a box that meets the highest safety standards and can safely transport two children, a large dog or your DIY purchases home. With a roll bar and side sliding door for easy entry and exit.

i:SY BUTTERFLY BAG

Unassuming at first glance, but when unfolded, it reveals its full beauty – or rather, its size, of course. Available in two sizes, our i:SY Butterfly Bag fits our i:SY CARGO models with 40 and 60 cm loading areas. Depending on the version, it has a volume of 40 l to 100 l or 60 l to 120 l. Made of weatherproof Docril, screwed to the frame, including 2 rain covers.

i:SY CAB COVER

Protection against the elements – sun or rain, our two-piece canopy provides optimum protection. Velcro fasteners, zip fasteners and a second roll bar create a weatherproof little capsule for passengers. The side walls can be conveniently rolled up and secured with elastic bands, making it easy to get in and out. Made from waterproof, weather-resistant Docril and PVC, as well as mesh fabric to protect against UV radiation.

i:SY WOODEN BOX

Minimalist yet versatile. The sturdy i:SY wooden box is equipped with a folding bench and belt holders, so that up to two children can sit in it. It is also ideal for trips with your four-legged friend or a visit to the garden centre. Available in lengths of 40 cm and 60 cm. Made of birch wood with an easy-care aluminium base.

Are your fingers, or rather your feet, itching to test ride our i:SY models? Then head to your nearest i:SY dealer. Get detailed advice and take a spin or two to decide which i:SY suits you best.

Visit our website - www.isy.de/gb-en/#retailer-search-modal - to find your nearest i:SY dealers and their contact details. Simply enter your postcode or town | city and get ready for your test ride!

 **Made
in
Germany**

We also stand for these values with the i:SY brand. Our compact bikes are manufactured in a high-tech production facility in St. Ingbert. The factory is one of the most modern bicycle and e-bike production facilities in Europe.

In order to meet the requirements for a product to be labelled 'Made in Germany', it must be manufactured in Germany. The most important components in the manufacture of i:SY compact

bikes, such as development, design, production and quality assurance, take place exclusively in Germany. While the development and design departments are based in Cologne, production and quality assurance take place in St. Ingbert. Our product managers are regularly on site at the factory to ensure the highest quality. We are particularly proud of the 'Made in Germany' seal and wish you a safe journey at all times.

Ride it! Love it!
